OFFENSIVE[®]
SECURITY

An Offensive Approach

Well-designed mitigation strategies need routine security tests. The best tests simulate the techniques and methods of an intruder. By encouraging students to use the same tools, techniques, and mindset as a hacker, we level the playing field for defenders. At Offensive Security, we teach that offense is the best defense.

OffSec's curriculum isn't just about technical skill, although we do develop that with rigorous training. We also challenge our students to Try Harder. This means developing a growth mindset, engaging critical thinking skills, and overcoming unforeseen obstacles.

From The Creators Of Kali Linux

Offensive Security have defined the standard of excellence in penetration testing training. Elite security instructors teach our intense training scenarios and exceptional course material.

The same expert security professionals that designed Kali Linux developed our courses. These professionals leverage their own real-world penetration testing experience to ensure an unwavering focus on the practical applicability of course materials.

Subscriptions

1

Learn Fundamentals

Fundamental 100-level content will prepare students for our advanced level courses.

2

Learn One

Gain access to a year of lab access plus two exam attempts for one selected course.

3

Learn Unlimited

Unlock all OffSec Training Library courses plus unlimited exam attempts for one year.

Learn about Topics intro to Intel Assembly, Intro to ARM, Intro to WINdbG and Intro to Analysis with IDA Pro.

EXP-100

Learn about Topics like web application basics, an introduction to cryptography and working with shells.

PEN-100

Learn about Topics in Cloud Security like Containers, Kubernetes and Cloud Architecture Security.

CLD-100

Learn about Topics like the SOC management process, enterprise architecture and Windows logging.

SOC-100

Learn about Topics like secure coding, web attacker methodology and input validation.

WEB-100

A Kali Linux Certified Professional (KLCP) is a power user of the Kali Linux penetration testing platform.

KLCP

Wireless Attacks introduces students to the skills needed to audit and secure wireless devices.

OSWP

TechnoValley AKS is one name that counts in the success stories of hundreds and thousands of IT professionals in India as well as abroad. We have polished the pebbles and presented a pool of talents to the corporate world since our foundation as TechnoValley Software India Pvt. Ltd., a promising and professional software development and consultancy services company in the country. Over the years, we have paved the path for an uncountable number of interns to achieve new heights in their careers. It is evident from our partnering initiatives with big brands and corporate giants like Microsoft, Red Hat, AWS, Offensive Security, CompTIA, EC-Council, IBM, Pearson, VMware and Cisco.

We have a global reach with worldwide consulting contracts that is more focused in Saudi Arabia, the United Arab of Emirates (UAE), Qatar and other nations in the Middle East zone where demand for data science, cloud computing, cyber security, networking, digital marketing, Python programming, robotics and Artificial Intelligence executives is extremely high. We hold a good reputation among hiring consultants and corporate giants due to our international standard and rational selection procedure of candidates.

We provide IT consulting to interns based on their requirements and make them job-ready in a very short span of time. We charge no fee or commission for placements, but we do encourage them to bear the cost of their internship expenses as we offer state-of-the-art infrastructure and experienced faculties to upskill them and simultaneously make them highly competitive in the job market.

At TechnoValley AKS, we oblige to the IT Policy 2017 of the Government of Kerala as we are based in the same state and strictly follow the governmental guidelines for all our consultation services offered to interns. All our IT programs and consultancy services abide by the law of the land.

We have hired highly experienced faculties to carve the generation with the required skill sets and help job seekers to leap forward in their careers. The programs covered here include Cyber Security, Information Security, Computer Security, Python Programming, Digital Marketing, Data Science, Cloud Computing, Digital Marketing, Robotics, Artificial Intelligence (AI), Networking, ERPS, e-governance Consulting, Mobile Application Developments (apps development) and several more in the IT segment.
